

Sustainable Energy Solutions

Solar Site Assessment Form

We design and install solar hot water and electrical systems for residential and commercial applications. We provide a free initial consultation that provides a detailed energy audit, upgrading cost analysis and availability of energy grants, solar energy rebates and federal/state tax incentives. In order to provide you with a complete Energy Savings Analysis, we need to have specific site information. Please provide as much of the following information as possible.

Person Submitting Analysis _____ Company _____

Email _____ Phone _____ Fax _____ Mobile _____

Residential

Number of Occupants _____ Annual Electricity Use _____ Hot Water Usage _____ (Aver 20 gal per person)

Current Heating/Cooling System _____

Interested In _____

Commercial

Type of Business _____ Annual Electricity Use _____ Hot Water Usage _____

Type of Building _____

Current Heating/Cooling System _____

Interested In _____

Swimming Pools

Length _____ Width _____ Depth _____ Indoor/Outdoor _____ (Circle One)

Pool Heater Yes _____ No _____ If yes, Type Gas _____/Electric _____ Other _____

Solar Panel Location

Ground Mount _____ Roof Mount _____ What direction does roof face? _____ (Solar panels angle to face South)

Solar shading from trees and tall buildings Percentage _____% Is the roof flat or pitched? _____
